About Us

We are a group of enthusiasts of cryptography and NFT arts with a common goal, to promote and publicize the difficulty faced by our feline friends and how adoption institutions also suffer from the lack of keeping and getting new owners for kittens suffering from abandonment by their former owners.

OUR MISSION

Promote adoption, raise and then donate funds so that institutions have less difficulty in maintaining their facilities and are able to donate our feline friends more quickly and in accordance with the law.

In addition to all the publicity that is needed to achieve our goals in the real world, we are going to bring this same subject to the digital world and make each investor adopt one of our kittens, we don't just want to sell you a cat, we want you to choose your avatar in our digital world.

WHAT IS NFT?

A non-fungible token (NFT) is a special type of cryptographic token that represents something unique. Unlike cryptocurrencies like Bitcoin and many other utility tokens, NFTs are not mutually interchangeable.

A fungible item, like money, can be exchanged for another item. A Real banknote can be substituted, as long as it is of the same value. Non-fungible items are works of art, rare objects, unique specimens, etc.

The non-fungible token represents something specific and individual and cannot be replaced.

Uses

tokens are used to create verifiable digital scarcity, as well as digital ownership and the possibility of asset interoperability across multiple platforms. NFTs are used in various applications that require unique digital items, such as cryptographic art, crypto-collectibles, and encrypted games.

OUR COLLECTION

Bored cats universe Collection is a collection of 1000 cats categorized by breed and rarity level. Cats are stored as tokens on the **polygon blockchain** and hosted on **IPFS**.

All cats have an origin which is told in their description. On our website you can follow the unfolding of the whole story in chapters. That's right, the story is being told with each **new NFT** revealed within the collection.

Upon reaching **1000 cats revealed**, the **2D pixel art** collection is finalized and will no longer have new cats revealed and the story is finally told from beginning to end, with that we reach the end of our first part of the project.

The collection is subdivided into two parts called **Pixel Arts 2D** and **Artes 3D**, understand a little about each one: **Pixel Arts 2D**

unique cats, but some breeds may have more than one specimen, so we can have around 5000 cats spread across the CAT TOWN city and other regions of this virtual world.

Each cat is made using a base model, created from a very famous meme on the internet, no algorithms will be used to create the cats, everything is handmade and with unique details. This collection is open to the entire community and everyone can create their own cats following the initial and main model of the entire Bored Cat story.

3D Arts

It is the continuation of the 2D collection, in this part the meta data of each NFT is updated with 3D objects and new items will be added to the collection, the new items will refer to our metaverse. Land, houses, cars and objects will be minted for exclusive use within the WORLD CAT world.

At that point the collection will be able to reach 10,000 unique items, but only 1,000 unique cats will be minted the rest are metaverse items.

HISTORY OF CATS

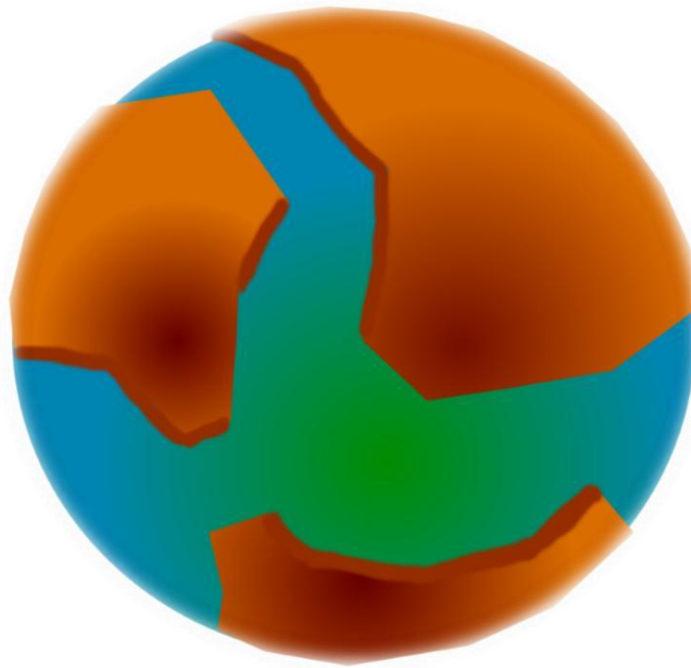

The story will unfold as the cats are minted, initially the 1st chapter will be released where it shows the arrival of **bored Bob** to **CAT TOWN** and the beginning of his journey to find new friends, then the next chapters will be released each week, making this story a community digital book, which means that the community will write the book for each cat minted in our collection that will be on the Solana network.

WORLD CAT – THE CAT WORLD

It's a feline metaverse where each of our NFTs come to life as the investor's avatar and each person can do whatever they want, having a second virtual life, managing stores and shopping for land, cars and objects that will be delivered in real life, a kind of marketplace and Second Life, nothing new, but very efficient in expanding this technology to the daily lives of thousands of people all over the world.

As a new world, WorldCat will be explored little by little and will be inhabited by cats (only cats, there are no humans there), remember Bored Bob? He will be the gateway to all this discovery of new cats and new spaces in this metaverse. Everything that is discovered in this world will be presented by him and thus opening a new path for investors looking for new land, homes and businesses.

Initially the metaverse will have between 5% and 15% of all WORLDCAT cleared this should correspond to the number of cats minted and the total land and objects sold in our sales phase.

BORED CATS POOL STAKING

SUPPORT POOL MEANING:

Betting pool is a platform or protocol where NFT's are blocked to earn passive income while still retaining their properties

Bored cat NFT community, let's create a platform to allow all our NFT holders to bet on NFT which will help them to earn passive income and also allow you to withdraw your NFT whenever you want.

Donation program for institutions that help homeless cats.

Our project has been innovating with the ideology of "HELP NEXT", this time our neighbor will be our feline friends who, according to research, have more than 1 billion stray cats worldwide.

Our project will search, select and contact institutions that have a solid and registered social project.

Our collection has a market rate of 5% and we will use 3% to donate to these institutions that we will select and through our social networks and our blog announce the donation, bringing transparency to the project, the other 2% will be used for project maintenance.

BRAND BORED CATS

WHAT IS A BRAND: A brand is a name, term, design, symbol, or any other characteristic that distinguishes one seller's good or service from those of other sellers

THIS will be a physical structure in the world of cats where we will produce t-shirts, shoes, hats with art of bored cats, which means that all our products will be made with the logo of bored cats

Bored Cats brand will deliver your goods/products worldwide

Benefits of our NFT tag holders on bored cats. Our nfts holders will have more discount on the purchase of our brand products, they will have more chances to win the brand raffle

Future and brand ambition bored cats

Our future and ambition is to provide clothes for the many members of the bored cat world at a cheap price.

We will also provide clothes for the stray cats and make them happy.

BORED CATS BRAND WILL DELIVER GOODS SAFELY AND FAST WORLDWIDE
